

For group plan members and individuals under 65

Cost relief with new Compass plans

Looking for a health plan that provides quality coverage and may help save you money?

Our new Compass plans can help you manage your health care costs without compromising the quality of care that you and your covered family members deserve.

Visiting preferred providers means lower costs

You'll pay less out of your own pocket – lower copayments, deductibles, and/or coinsurance – when you visit “preferred” primary care providers (PCPs) and hospitals.

You can still visit other health care providers who accept your plan – they're called “participating” health care providers, but you will pay more.

How to find Compass ‘preferred’ providers

PCPs: You can search the “Find a doctor” tool on connecticare.com and look for PCPs with the Compass symbol in their listing.

Hospitals: The Compass “preferred” hospitals are:

Bridgeport Hospital
Bristol Hospital
Charlotte Hungerford Hospital
Connecticut Children's
Danbury Hospital
Day Kimball Hospital

Griffin Hospital
John Dempsey - UCONN
Johnson Memorial Hospital
Middlesex Hospital
Milford Hospital

Norwalk Hospital
St. Francis Hospital
St. Mary's Hospital
Sharon Hospital
William Backus Hospital
Windham Hospital

Look for this symbol

when searching for doctors and hospitals. It indicates that the doctor or hospital is Compass “preferred.” And that could mean savings for you when compared with other health care providers in your plan's network.

Visiting preferred providers means lower costs

You can visit hospitals in Connecticut that are not listed above with a Compass plan network. You will, though, pay more in deductible, copayments, and/or coinsurance.

All specialists are also preferred health care providers with Compass plans.
